Michel Boury : Training Manager

Michel Boury, Manager of S2M's training center, has a Masters in Electronics obtained in 1987. He has been with S2M since he joined the company in 1989 as a service technician.

After many years traveling the world commissioning machines and upgrading cabinets, since 2005 he has been responsible for the S2M in-house Training Center, where his excellent inter-personal qualities and natural communication skills ensure that he makes the most of his experience to explain magnetic bearing technology and provide trouble-shooting tips to trainee operators from all over the world.

In-depth knowledge of S2M products

- Electronics specialist
- Magnetic bearings expert (electronics, mechanics)
- 18 years with S2M, from the analog control of the 1980s to today's digital technology

World-wide experience in tuning & commissioning

- his favorite job : tuning engineer
- turbo expanders for air separation process and natural gas treatment - notably Sleipner platform, Norway.
- PV52 compressors (Siemens) in India
- Man Turbo "HOFIM" compressor (world's first machine with 4 bearings and rigid rotor) on the Nam Pernis West depletion storage field

Production management

- 1 year as production manager for turbo molecular pump controllers

Control cabinet upgrade

- Project manager for upgrade of control cabinets, to extend the life of the equipment - 30 upgrades in 6 years.

Customer Training

- Trained as an instructor, building on his natural communicating abilities
- Involved in customer training since 2005: 130 operators trained in 2006.
